## TrendWatch Alberta Omnibus Survey

February 26, 2019

# Methodology

- Survey questions were administered through the *TrendWatch Alberta Omnibus* between February 13 to 21, 2019.
- *TrendWatch Alberta* is a monthly omnibus survey of 900 Albertans, ages 18 and over. The margin of error for a probability sample of 900 people is plus or minus 3.3 percentage points, 19 times out of 20 (i.e., at a 95% confidence interval).
- Surveys were conducted using our “True Random Sample, Hybrid Delivery (TRS-HD)” methodology. This approach involves live telephone interviewers initially contacting respondents at random, and giving the respondents the option of answering the survey over telephone at that time, answering over the telephone at a more convenient time, or receiving the link and answering the survey on-line.
- The initial sample list contains approximately 50 percent landlines and 50 percent cellphones. Interviewers make up to five attempts to reach each phone number in the sample before classifying it as unreachable.
- All surveys were conducted by qualified interviewers working out of Trend Research’s centralized CATI facility in Edmonton. Field supervisors were present at all times to ensure accurate interviewing and recording of responses.
- The interviewing staff at Trend receives extensive training on the proper administration of interviews and are closely monitored by supervisors. A minimum of 10 percent of each interviewer’s work was unobtrusively monitored for quality control.

# Confidence in Leader's Ability to Get Pipelines Built

Albertans have more confidence in Jason Kenney's ability to get pipelines built than they do in Rachel Notley's ability.

More than half of Albertans (57 per cent) say they are very (15 per cent) or somewhat (42 per cent) confident in Jason Kenney's ability to get pipelines built if the UCP wins the upcoming provincial election. Just over one-third of Albertans (36 per cent) are either very (nine per cent) or somewhat (27 per cent) confident in Rachel Notley's ability to do the same if the NDP wins the next election.

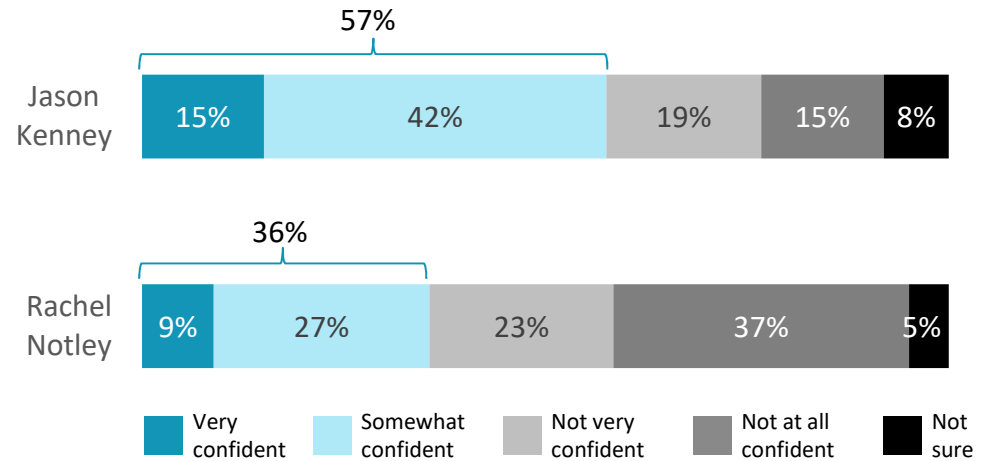

In Edmonton, Kenney holds a slight lead over Notley in terms of confidence to get pipelines built (50 per cent very or somewhat confident versus 45 per cent). In Calgary (62 per cent versus 36 per cent), and in the rest of Alberta (59 per cent versus 24 per cent), Kenney holds a commanding lead over Notley.

Confidence in Jason Kenney's ability to get pipelines built is also particularly strong among:

- Higher income earners (66 per cent of those with an annual household income over \$120,000 versus 51 per cent of those with an annual household income under \$60,000),
- Those with a high school education or less (62 per cent versus 46 per cent of those with a postgraduate education), and
- Men (61 per cent versus 53 per cent of women).

Confidence in Rachel Notley's ability to get pipelines built is particularly strong among:

- Those with a postgraduate education (55 per cent versus 25 per cent of those with a high school education or less), and
- Public sector workers (46 per cent versus 30 per cent who work in the private sector).
